

4 WATT RECHARGEABLE LED FLASHLIGHT

T4™

T4 SPECIFICATIONS

 100-LUMEN LED OUTPUT

 2-HOUR BURN TIME

 LITHIUM ION BATTERY INCL'D

8.0" length x 1.1" diameter

4 watt lifetime LED

Up to 300' effective range

Zero to full recharge in 3 hours

Includes charger cradle plus power supplies for AC and DC charging

Mid-body switch—located for optimal control; press for momentary on, click for constant on/off

ORDERING INFORMATION

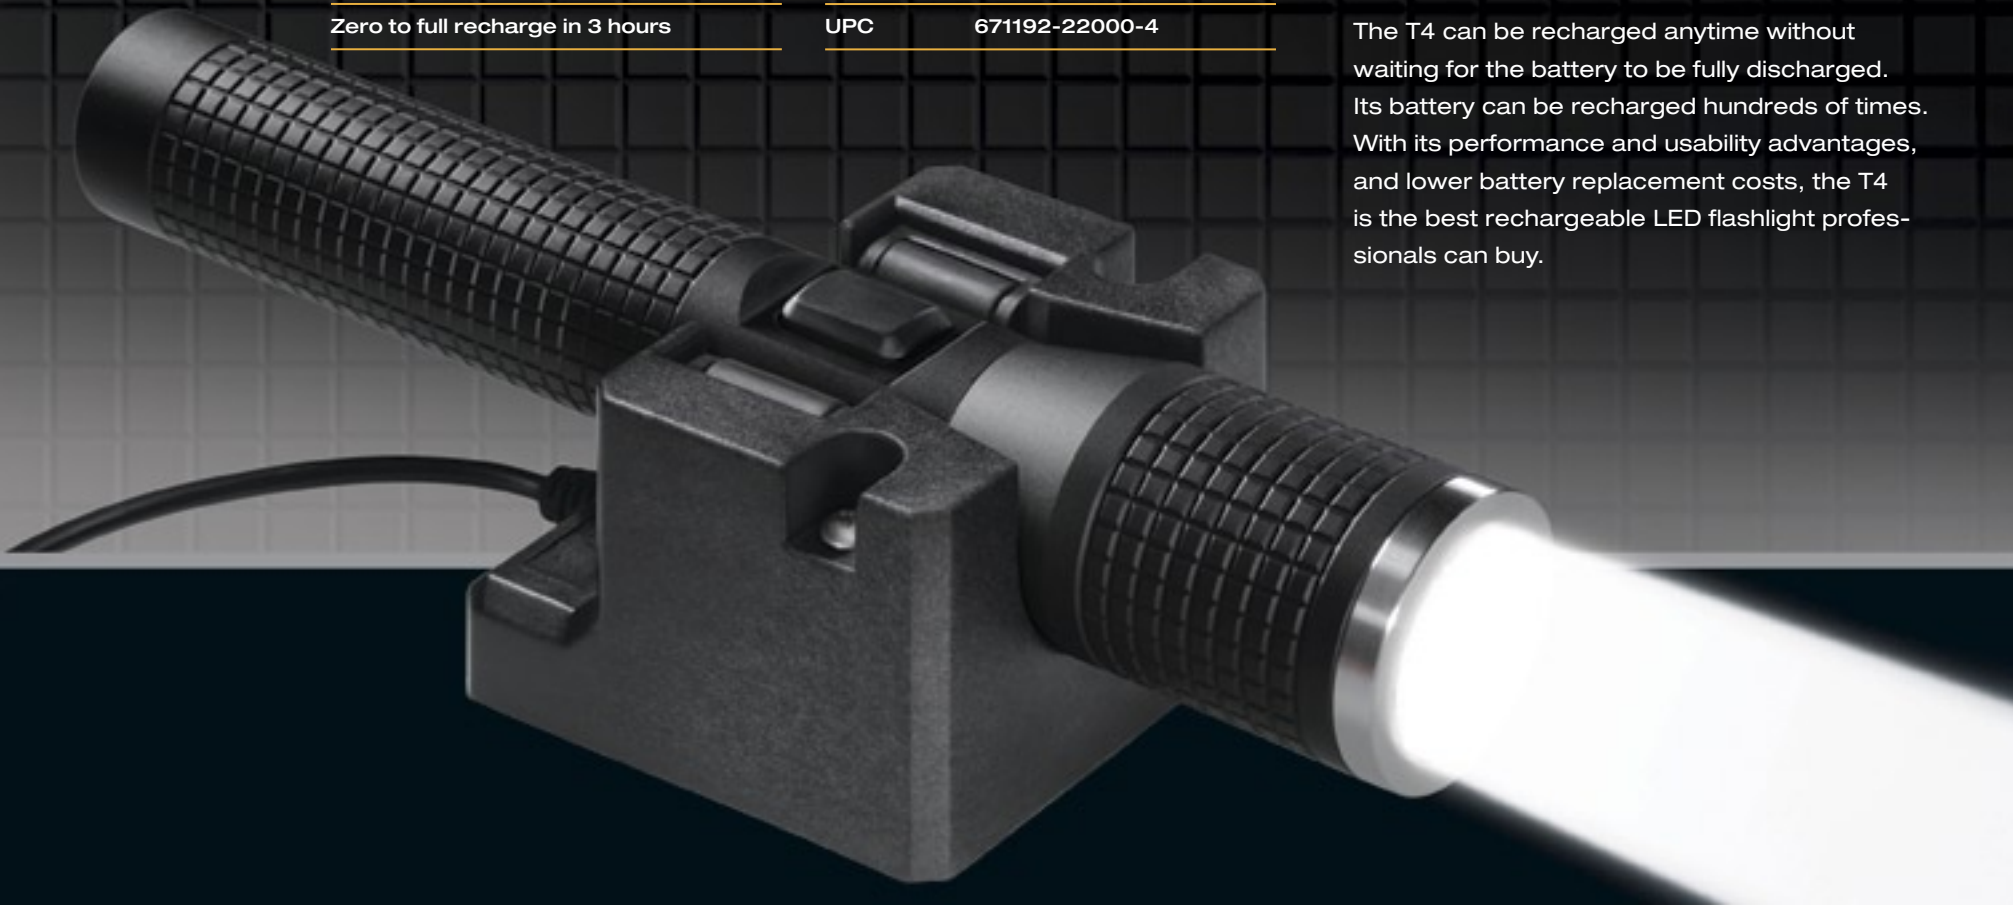

MODEL T4-WB

UPC 671192-22000-4

The only dedicated rechargeable LED duty light

The INOVA T4 offers major benefits over competing rechargeables: it provides up to two times the burn time (up to 2 hours of constant, non-dimming output), recharges in about one-quarter of the time and projects light up to 300'.

The T4 can be recharged anytime without waiting for the battery to be fully discharged. Its battery can be recharged hundreds of times. With its performance and usability advantages, and lower battery replacement costs, the T4 is the best rechargeable LED flashlight professionals can buy.

INCLUDED WITH THE INOVA T4

Charger—engineered from the ground up

Some manufacturers conveniently ignore the charger's importance to flashlight performance. We totally reinvented and engineered this critical piece of equipment, beginning with a compact, low-profile body for space efficiency.

- 1 Engineered spring-loaded rollers hold flashlight securely while offering ease of insertion/removal
- 2 Gold-plated charging contacts prevent reverse charging
- 3 Blue LED indicates recharge state
- 4 Nylon and glass fiber composite is strong and resilient

Lithium Ion—the best rechargeable battery

Unlike rechargeables that use multiple, heavy and inefficient NiCd batteries, the T4's high energy capacity comes from a single, efficient lithium ion battery.

- Recharges hundreds of times
- Supplies longer burn times
- Recharges in less time
- Can be recharged anytime—no waiting for full discharge
- Holds a significant charge even after months of storage

AC Power Supply

Quality AC Power Supply is smaller, lighter and more useful than competing products.

- 1 Optional international Adapter Kit—simply snap on/off

DC/Vehicle Power Supply

Sturdy DC/Vehicle Power Supply ensures secure connection to standard cigarette-lighter receptacles.

- 1 All INOVA T4 power-cable couplings are designed to stay connected in the most demanding environments.
- 2 Built-in fuse provides electronic protection

INOVA T4 ACCESSORIES AND REPLACEMENT PARTS

T4 Flashlight w/o Battery
